PROFILE

First Class Computer Science graduate, motivated and enthusiastic, with a passion for collaborative learning, growth, and gaining experience. Proficient in critical thinking, analytical problem-solving, and team collaboration. I love practical tasks that require hands-on work, and I am eager to apply the skills and knowledge that I have to drive meaningful impact in a dynamic and challenging environment.

PROJECTS

1. **Friendly - Social Media Platform**

Developed a real-time full-stack social media platform that supports secure user authentication, post creation, likes, comments, profile management, and instant messaging, using MongoDB, Express.js, React, Node.js, JWT authentication, and Socket.io for real-time communication.

2. **NITACB – AI Support & Onboarding Chatbot**

Developed a full-stack enterprise chatbot platform during my internship at the National Information Technology Authority – Uganda to automate FAQ and ticket-driven support queries, streamline onboarding workflows, and provide organization-wide information access through a conversational interface, using JavaScript, Python, frontend-backend system design, chatbot workflow engineering, and knowledge-base integration.

3. **Daystar_DayCare Management System**

Developed a role-based full-stack daycare management application with attendance monitoring and analytics dashboards that improved daycare administration through child registration, babysitter scheduling, attendance monitoring, incident management, and automated parent payment reminders using React, Node.js, Express.js, MySQL, JWT, Tailwind CSS, and Chart.js.

4. **EcoClassifier – AI-Powered Smart Waste Sorting and Analytics System**

Built an AI-powered smart bin and web analytics platform that automatically classifies waste at the point of disposal into plastic, paper, and general waste using a VGG16 deep learning model, then actuates ultrasonic sensors, stepper motors, and servo motors via Raspberry Pi to route waste into the correct compartment. Developed a React-based dashboard and Node.js backend for real-time event logging, waste analytics, and system monitoring, using TensorFlow Lite, Raspberry Pi GPIO, React, Node.js, Express, and MongoDB.

WORK EXPERIENCE

Data & IT Officer (Apprentice) — *MARKH Investments Ltd & Honda by MARKH,* Apr 2026 – Present

MARKH Investments Ltd. is a logistics and sales company where I support data-driven decision-making, ERP system administration, and day-to-day IT operations.

- Developed and maintained business intelligence dashboards and reports by extracting, analyzing, and visualizing operational and sales data to support strategic decision-making and improve business performance.
- Administered and supported the organization's ERP system, managing user accounts, access permissions, system performance, and ensuring data integrity across business operations.
- Led ERP user onboarding and training by provisioning accounts, conducting user training sessions, and providing ongoing technical support to promote effective system adoption.
- Performed system testing, User Acceptance Testing (UAT), and issue tracking, collaborating with stakeholders to identify enhancements and support continuous system improvement.
- Delivered IT support services by managing company email accounts, troubleshooting hardware and software issues, and providing technical assistance to ensure uninterrupted business operations.

Intern, Directorate of e-Government Services — *National Information Technology Authority – Uganda (NITA-U),* 4 months

- Contributed to the development of an AI-powered support chatbot by building frontend and backend components using React, Node.js, and Python.
- Integrated the Mistral AI model via OpenRouter and implemented web scraping solutions to enhance chatbot intelligence and context-aware responses.
- Assisted in Drupal 11 CMS setup, customization, content management, and application testing to support system functionality and user experience.
- Participated in UI/UX wireframing, system debugging, API integration, and quality assurance throughout the software development lifecycle.
- Collaborated with multidisciplinary teams while gaining practical exposure to enterprise ICT operations, including data center, cybersecurity (CERT), and telecommunications environments.

EDUCATION

BSc Computer Science — *Uganda Christian University* 2023 – 2026

Uganda Advanced Certificate of Education — *Lubiri Secondary School* 2020 – 2022

Uganda Certificate of Education — *Mengo Senior School* 2015 – 2019

OTHER CERTIFICATES

Certification in Introduction to IT Essentials
Certification in Cybersecurity Fundamentals
Certification in Introduction to Data Science
Certification in Python for Data Science and Machine Learning Essentials

TECHNICAL SKILLS

- Software Engineering (JavaScript, Python, TypeScript, MySQL, MongoDB, React, NextJs, Docker)
- Data entry, analysis, and visualization (Python, Excel, Power BI, Tableau, Jupyter)
- Computer Hardware and Software maintenance skills
- Machine Learning (Python, Jupyter, Google Colab)
- Frameworks & Libraries (React, Next.js, Express.js, Node.js, TensorFlow, NumPy, Socket.io, Chart.js, etc.)
- Version Control: Git, GitHub (repository management, branching, collaboration workflows)
- API Integration & Testing (Postman, RESTful API design and integration, backend endpoint development)
- Network Engineering (LAN)

SOFT SKILLS

- Communication
- Presentation
- Problem Solving
- Teamwork
- Time management

REFEREES

Mr. Nabasa Isaac	+256 751 839477,
Ms Muwanguzi Denise Priscila	+256 755 133406,
Mr. Kasole Ahmed (Lecturer at UCU)	+256 780 573769,
Ms. Mwebembezi Nicole Mbabazi	+256 787 533245
